

APP238 (H/SG-Neo(L+I))

Replicon description: genotype 1a subgenomic replicon with NS3 and NS5A adaptive mutations; contains the NPTII selectable marker.

Genotype: 1a

Strain: H77

Replicon configuration: subgenomic

Reporter(s): NPTII

Adaptive mutations: in NS3 and in NS5A

Notable features: Stable cell lines generated from this plasmid are available
